JS: JSON, AJAX, ExtJS, jQuery, YUI2  
Mobile: basics of Samsung Bada and Google Android  
Version Control Systems: svn, git  
IDE: Eclipse (PDT, Aptana, Spket, AXDT), NetBeans, Borland  
C++ Builder  
SEO, Web Security, Web Accessibility, Improving pages  
performance and loading time, debugging and profiling code  
OS: Linux, Windows  
Open Source

---

August 2006 - January 2007 (5 months)

**Fabryka Stron Internetowych (<http://www.fsi.pl/>)**

PHP Programmer

- creating administration panel for portal: <http://www.bryk.pl/> - very useful portal for students – related to Greg Publishing,
- creating websites powered by internal CMS - Fsite for real estate firm (<http://www.fsite.pl/>).

---

**Selected projects**

PakietyTurystyczne.pl (<http://pakietyturystyczne.pl>)

April-August 2013

- extending ERP system with management of travel packages, related services and attractions (backend),
- handling booking process (frontend and backend),
- integrating website with paying system PayU (frontend and backend),
- implementing Tourist Area section (frontend and backend),
- integrating signing in to the Tourist Area with Facebook account.
- creating administrative scripts for Linux shell (Bash)/Windows console.

BSS (<http://www.bss-transformation.comarch.com/>)

January 2011

- implementing microsite allowing to share white papers and brochures with simple administration panel

Pregnancy Portal (<http://www.ciazowy.pl/>)

January 2008 – July 2010

- overseeing pregnancy portal from technical point of view,
- creating SEO optimisation plan,
- extending administration panel with ExtJS technology,
- organizing and prioritizing work for development team.

Website: IPS UJ (<http://www.ips.uj.edu.pl/>)

September 2009 – July 2010

- updating old website based on Joomla to completely new layout,
- small modifications inside administration panel,
- conduct training for website administrators,
- project support and maintenance.

ExtJS Charts, YUI Charts

Summer 2009

- extending YUI Charts used inside ExtJS framework with capability of live chart edition: by drag&drop chart's points.
- first solution was implemented only with JavaScript,
- second one, demanded by client, had been created in ActionScript3 (Yahoo staff developed Flash charts in ActionScript3).

ZNF (<http://www.zeronotic.org/>)

June 2007 – August 2007

- contribution to ZNF - PHP5 MVC framework, which was used with Master of Thesis project.
- project based on approach similar to Apache Struts (<http://struts.apache.org/>).
